Project

Portfolio   project1_link

**Technologies used :** React JS, Bootstrap, CSS

Developed a responsive web application for Portfolio where other people like interviewers can see about, education, list of projects, skills, contact info of a person

- Implemented different sections of the application using React components, props, lists, keys, State & Event Handlers.
- Implemented responsiveness by using Bootstrap grid system and flex classes and CSS box model properties through mobile-first approach.

Food Munch   project2_link

Technologies used : HTML, CSS, Bootstrap

A responsive website that lets you browse through a wide range of food items with ease.

- Built with a mobile-first approach, this website features HTML structure elements and Bootstrap components to ensure seamless navigation.
- Get a clear view of the food items with product videos, available at your fingertips.

My Projects (My Projects Page)

project3_link

Technologies used : HTML, CSS, Bootstrap

Created a web platform showcasing an individual's accomplished projects for interviewers

- Utilized various HTML block and inline elements to construct the banner section and project cards.
- Employed CSS3 features like background, flex, and box model properties, along with relative (vh, vw) and absolute (px) units for styling.

Free Cources

project4_link

Technologies used : HTML, CSS, JavaScript

You can learn C, C++, Python, Java, php, .net, Rust and many more languages for free. You can also access the source code, exercises, quizzes and projects that will help you practice and improve your coding skills.

Achievements

Hackathon Champion
Secured second place in the college hackathon, demonstrating strong problem-solving and technical skills in a competitive environment.

Academic Excellence Award (3rd Semester)
Achieved the highest academic standing in the 3rd semester, recognized by faculty and the director for outstanding performance.
